AUDITOR'S REPORT

January 25, 1968

This is to certify I have examined the books of the Treasurer of the Town of Wendell for the year ending December 31, 1967, and believe them correct.

ELINOR L. GODDARD
Auditor

REPORT OF THE VETERANS SERVICE AND BENEFITS

To the Honorable Board of Selectmen
Wendell, Massachusetts

Gentlemen:

I herewith submit the annual report of this department of the Town of Wendell for the year 1967.

May I ask your indulgence with reverence to the passing of one who served as Director and Agent for Eastern Franklin District with such zeal over the past six years, namely, Lawrence B. Horrigan, who died May 10, 1967. His service to this district may be lost but not forgotten.

May I give a word of thanks to Orange Selectman Roger W. Mallet for services rendered during the interim as acting agent until my appointment of September 3, 1967.

Under Veterans' Benefits we had two continuing cases, one of which Medicare and Medex is applied, as recipients over sixty-five years old are eligible.

Last year's Cold War Bill, meaning veterans with service since January 1955, has added Provisions relating to the Vietnam era Service which means service beginning August 5, 1964 and ending on such date as is later determined by the President or Congress. That period is recognized as a "Period of War" for the purpose of establishing entitlement to VA

benefits and active service during that period qualified for a range of VA benefits.

This office is ready and willing to assist any veteran or survivor in assistance of any information or claim.

Memorial flags were issued to honor the memory of veterans from this district.

We appeal to all veterans in this district that have not registered with this office to do so, this includes any veteran regardless to time or length of service.

Respectfully submitted,

WALTER E. MCAFEE
Director and Agent

REPORT OF EASTERN FRANKLIN WELFARE DISTRICT

Honorable Board of Selectmen
Wendell, Massachusetts

Gentlemen:

Herewith submit the annual report on the activities of this office in behalf of the recipients of public assistance for the Town of Wendell.

In the year of 1967 we had many changes in the structure of Public Welfare in Massachusetts. The greatest change was the passage of legislation whereby the State will assume responsibility of the welfare as of July 1, 1968. 1967 was also the first full year of Medicaid, which is the program which covers medical expense for needy families in the community. After a year we find that this program will require some changes but seems to have taken hold very well.

This will be the last report this office will submit, as we will become employees of the State on July 1, 1968. We wish to thank the Town officials for their cooperation during the years they have been members of the

Eastern Franklin Welfare District.

Below is an accounting of the various categories of assistance:

OLD AGE ASSISTANCE

Town Appropriation	\$2,000.00
Expenditures	<u>1,339.10</u>
Unexpended balance Dec. 31, 1967	660.90

CORNELIUS B. SHEA
Director

REPORT OF THE FIRE DEPARTMENT-1967

Ass't. Chief
Rubert V. Goddard

Chief
Myron A. Gibbs

Ass't. Chief
George Willard

VOLUNTEER FIREMENS ASSOCIATION

President
John Carey

Secretary & Treasurer
Joseph T. Barry

The Wendell Fire Department responded to 20 alarms during the past year; including --5 Chimney fires; 12 forest fires; 1 dump fire; and 2 Dwelling House fires.

A Total of 496 Man Hours has been spent answering these alarms and the men of the department are to be complimented for their fine work and fast response in answering calls which has all helped to keep losses to a minimum.

The annual inspection of the Center School was made; the Chimney cleaned and inspected, with recommendations for repairs to same made to the school committee.

In the Fire Drill held the building was cleared, in a very orderly manner, in 32 seconds. Principal Harry Williston and Mrs. Raymond are to be commended for their fine work in fire safety instruction.

Janitor Harry Thayer is also to be commended for his efforts in keeping the building free of fire hazards.

The department Alarm System has been greatly improved with the installation of a larger Siren on the Station, and also Red Base Fire phones have been placed at 5 locations to insure prompt answering of calls for assistance. The number to call in the Case of Emergency is 544-3412.

The Volunteer Firemens Association has raised by various projects in the past year the sum of \$786.00.

Of this amount \$450.00 has been spent for equipment and materials for the completion of the fire station and \$155.00 used for the purchase of the Radio Receiver at the Station.

The members have been very busy working in their free time on the station. The outside has been completed and the upstairs meeting room is well on the way to completion at this time.

Respectfully submitted,

MYRON A. GIBBS

Chief

Wendell Fire Department

---------	--	--------

Another good year for our library. Circulation continues to be good. Many books were donated. Donors were Mrs. Yvonne Hildreth, Mrs. Henshaw, Ella Hebert and Mrs. Herrick. Mrs. Herrick's books are in memory of her husband. The light fixtures are now complete. The new floor furnace has been installed. At last we have adequate heat. Fines of seven dollars were collected this year.

REPORT OF THE SUPERINTENDENT

To the Wendell School Committee:

In as much as this is my first report as your Superintendent, I feel that it should be functional rather than statistical. It seems to me that the report should offer a comprehensible, easily readable assessment of our present program and future direction.

As the year 1967 takes its place as a natural milestone in history, we cannot help but observe that a stable society becomes less predictable than ever before. Vastly accelerating scientific and technological discoveries are creating new products and professions. Materials non-existent a few years ago are today a reality. All this makes obsolete an education based on a set of fixed beliefs. The new education demands a strong curiosity, a wondering about how and why things work and a desire for more knowledge. It should develop in our children a scientific spirit; open mindedness, a willingness to adapt and to reserve judgment and a deep respect for fact. The child must learn so that throughout his life he will continue to teach himself. He must be prepared to expect a continuous process of training and education. To this end the child himself is the architect of his own intellectual growth; the teacher performs the role of diagnostician and resource engineer.

The Town of Wendell is fortunate to have retained the services of its Elementary Principal for another school year. Mr. Harry Williston is an unusual teacher and a dedicated administrator. Mrs. Linda Raymond was hired this year to work with grades 1-3. She has been well received by both students and parents.

The basement ceiling of the school has been given a fire proof treatment as requested by the State Safety Inspector and further strengthening of the floor supports will be added this year.

The Superintendent and the School Committee will start plans for a public Kindergarten program to be started by 1973. Recent Guidelines published

by the State Department of Education will have its impact felt as we get closer to the day when a K-12 Region will become a reality. Certainly Wendell cannot justify spending close to \$1000 per pupil while its children do not get gym, instrumental music or one teacher per grade during their elementary program. For the good of all the children we hope plans to regionalize will develop rapidly in the best interests of the children.

The high caliber services of Mrs. Barbara L. Zolli, our Art teacher; Mrs. Tacie C. Mann, our Director of Pupil Personnel Services; Mrs. Shirley Donoghue, our School Nurse; and Mrs. Clara Cook, our Music teacher provide the children in Wendell with educational advantages not realized in many other Communities in the Commonwealth.

At this time I also wish to express my sincere appreciation to all those members of the Central Office staff-Mr. Charles Sullivan, the Administrative Assistant; Mrs. Gerry Waid, Secretary to the Superintendent; Miss Catherine Bagdonas, Bookkeeper; and Mrs. Joan Taylor, our part-time Clerk. To the Wendell School Committee a deep and personal thanks for their sincere dedication and unusual support for our entire school program.

With this new and greater emphasis on the orientation of our youth in the problems of our times, the development of their skills, the broadening of their concepts, the strengthening of their self-esteem and the nobility of American principles and institutions, we wholeheartedly dedicate ourselves as we move forward into the uncertain years ahead.

Respectfully submitted,

ROBERT L. GILBERT
Superintendent of Schools

REPORT OF THE PRINCIPAL

TO: Mr. Robert L. Gilbert, Superintendent of Schools

It is with great pleasure that I submit my third report as Principal of the Wendell Center School.

To improve is to make better and that is what we at the Wendell Center School are doing.

To improve the Reading Program we have purchased new books for all students. The School Library was increased by about fifty volumes. New dictionaries were purchased to replace some that were more than twenty years old. With Modern Mathematics now holding a firm place in the curriculum we are starting to explore some of the newer techniques in the teaching of English and Spelling. The Social Studies Program has been strengthened this year by the acquisition of several new wall maps. The school has adequate wall maps and globes in both classrooms now.

The present first grade students were very fortunate last summer to be able to attend a three week pre-school program at the Wendell Center School. This program was very successfully taught by Mrs. Jewett. The children were instructed in school procedures, social conduct, pre-reading, and number concepts. This program proved to be very beneficial to the students and I am happy to say that there will be similar programs this summer.

The pre-school program was not the only thing that happened at the school last summer. Harry Thayer, with the help of a boy provided by the Federal Work-Study Program, did much to improve appearance of the grounds and building. The storm windows were all removed and repaired. The playground was repaired from winter damage and the tall grass in the southwest corner was cut to increase the size of the play area.

After one year of teaching, Mrs. Jewett, retired to remain at home to raise a family. Her place has been filled by Mrs. Linda Raymond. Mrs. Shirley Donoghue is back as School Nurse after a years leave of absence. The Art program has been expanded greatly this year under the very capable supervision of Mrs. Barbara Zolli. I am happy to report that Mrs.

Cook is back with us once again as Director of our Music program.

The progress and improvement of the Wendell Center School is due to the dedication of many people interested in the welfare of our children. To the list above we should add Mr. Harry Thayer, whose unselfish devotion to the school is something we cannot praise enough; Mr. Myron Gibbs, our faithful bus contractor who has helped us in more ways; Mrs. Hebert and Mrs. Herrick who have helped to make the library program a continued success; Mrs. Lydia Ellis for her assistance as Town Treasurer; the Superintendent and his office staff for their help; and to the Members of the Wendell School Committee who are working so hard to improve the school to make it a better place in which to learn.

Respectfully submitted,

HARRY S. WILLISTON III
Principal

TO THE MEMBERS OF THE RALPH C. MAHAR REGIONAL SCHOOL COMMITTEE AND VOTERS OF THE RALPH C. MAHAR REGIONAL SCHOOL DISTRICT, I HEREWITH SUBMIT MY ANNUAL REPORT AS YOUR SUPERINTENDENT.

The Mahar Regional School Committee held eleven regular meetings, four budget meetings and twelve meetings on teacher contract negotiations during 1967. Reviewed in this report are the major highlights and accomplishments of the year.

FINANCE

The Committee, faced with rising costs in all areas, devoted four full meetings to deliberations on the 1968 Budget. Meetings, as in the past, were open to town officials and the public; and a public hearing was held on November 16 as prescribed under the Regional Agreement.

The Gross Budget adopted for 1968 was set at \$893,226 up from \$836,003 in 1966. As in 1966, the largest increase was in the Instruction Account where an increase of \$39,701 was incurred. Income was budgeted at \$181,226 which included \$15,023 from Surplus Revenue. The final net budget adopted was \$712,000. The net assessments to the five member towns are shown in a separate financial statement in this Report.

PERSONNEL

The Mahar Committee held twelve meetings with the Mahar Teachers Association for the purpose of developing a contract on wages and other conditions of employment. These meetings were conducted in a professional atmosphere and a better understanding of educational needs by both groups was one outcome of these negotiations.

A contract was signed with the Mahar Teachers Association on September 12. Following this, the two groups negotiated on a salary schedule for the 1968-1969 school year. An agreement was reached and signed on November 2. The salary schedule provides for a bachelor's schedule, \$5900-\$8900, Master's Schedule, \$6300-\$9559, Master's plus 30 Hours, \$6700-\$10,200.

The problem of securing teachers for the school year has been most critical. Two positions remained unfilled for the first half of the year with substitutes carrying on the work. The improved salary schedule should help to alleviate this problem although a shortage of certified teachers exists throughout the country.

NEW MINIMUM STANDARDS FOR EDUCATION

Since the advent of the Willis-Harrington Report on education in Massachusetts, a number of significant changes are being implemented by the Department of Education. Some laws and regulations are currently in effect and some are still listed as recommendations for which guidelines are being developed. Some significant changes are:

1. The Teacher Minimum Salary Law raising the minimum salary to \$5750 effective September 1, 1968.
2. The regulation that school year shall consist of 180 days of actual school attendance. Also recommended--a 4 to 6 week summer session on a voluntary basis.
3. A secondary school shall operate not less than 5 1/2 hours daily, exclusive of lunch or recess.
4. For grades 7-12, a standard of 120 minutes weekly be scheduled for physical education. Pupils who can benefit from corrective exercises shall have corrective or adaptive programs.
5. Tentative regulations are being considered for the education of perceptually handicapped children.
6. Recommendations on Minimum Standards for Staffing of the School have been recently forwarded to the Committee for study. The guidelines recommend 60 classroom teachers per 1000 pupils.

7. Each secondary school shall move to attain at least 10 non-classroom professional personnel per 1000 students. Schools are also encouraged to utilize the teacher aides as auxiliary personnel.

The Mahar Committee has been aware of these impending changes and has moved as far as possible to implement them. The salary schedule has been raised, the school calendar provides for 182 days and the school day is well above the minimum requirements. A waiver has been requested in the area of physical education as it is impossible to schedule three periods of physical education for each student weekly with present facilities. The matter of teacher-pupil ratio and teacher-aides is under study by the school administration, the Teachers Association and the Mahar School Committee.

The new requirements listed above are not radical in nature and must be implemented if we are to have quality education. To maintain the status quo today means to fall behind.

SCHOOL DISTRICT REORGANIZATION

The Regional School District has completed one year as an expanded five town region and the move has proved successful. The 14 member committee has worked as a closely knit unit. During the year, the By-Law sub-committee developed new by-laws for the Committee, and a start has been made on coding school district policies. A larger committee has made it possible to use sub-committees to a greater extent than in the past.

The Committee has worked closely with the five regional district planning committees appointed last March to consider the merits of a consolidated K-12 district. The Mahar Committee, faced with enrollment increases and a critical lack of facilities, has gone on record in favor of a close cooperation with the local school committees in their problems of school facilities and the coordination of educational programs.

In this regard, the Department of Education in November issued a series of guidelines for school district organization. The most im-

portant of these guidelines calls for a school committee with less than 2000 pupils under its jurisdiction to present a plan by December 31, 1969 outlining its plan to become a part of a school district operating a complete Kindergarten through Grade 12 educational program governed by a single school committee with one superintendent of schools. At the present, these guidelines are still in the formative stages and school officials will be fully involved in their approval and implementation.

The area of vocational education is still unresolved and, at the end of the year notice comes that the New Salem Vocational School would close as of June, 1968. This may present a problem to Mahar as seventy students will be affected in the regional towns. There is no space available at Mahar and no funds have been provided in the 1968 budget for them if they were forced to return. These problems will face the Committee during the coming year.

Finally, I wish to report that the agreement by which the Mahar Superintendent has taken over the supervision of the Petersham Department has worked out in a satisfactory manner. Educational benefits should result as the year progresses.

The second half of this report has been prepared by Principal Edminster and covers the progress made in the curriculum of the school. I can report that the past year has been a successful one and I wish to commend the administration, faculty, and staff on their professional accomplishments.

RALPH C. MAHAR REGIONAL SCHOOL ANNUAL REPORT
OF THE SCHOOL, January 1, - December 31, 1967

CURRICULUM

The curriculum being the focal point of any educational institution demands constant review and development by the faculty and administration. In an effort to insure an adequate program on instruction designed in the best interest of our students it is essential to have the proper balance of many contributing factors, a combination of which provides for the program of progressive education so necessary in today's world.

During this past year, numerous innovations have been introduced to all instructional areas, both academic and special, and an analysis of the whole program indicates that in each field of endeavor the educational needs of our students are being fulfilled. The program contains breadth of offerings and an effort is being made to constantly improve the quality.

Numerous innovations have been introduced in all instructional areas, both academic and special, and an analysis of the curriculum indicates a well balanced program. In each academic field of endeavor the needs of our students are being adequately fulfilled.

ENGLISH

As always, in the English department, continued emphasis is placed upon the basic foundation areas of reading, writing, speaking - and a balanced program in grammar, literature spelling and vocabulary are all stressed to different degrees in all grades.

SOCIAL STUDIES

The Social Studies program continues to emphasize and improve upon the conceptual approach in all areas. The use of audio visual and other instructional materials which have been acquired during the past two years have contributed much to the establishment of a more dynamic type of presentation in Social Studies classes. Curriculum Review and Development studies have included and will continue to include in 1968 among others the Cranbrook Curriculum Conference Report, conceptual approach to the Social Studies sponsored by the Syracuse University Curriculum Center and the High School Geography Project. The much discussed study of economics continues to be stressed along with all levels of government.

SCIENCE

Science continues to lead the way in the number of innovative programs developed and consequently ranks first as innovations in our school. Accomplishments during the past year include expansion of the Earth Science course, revision of the chemistry honors course including qualitative analysis, introduction of the new introductory Physical Science program (IPS) in Grade 9, adoption of the BSCS

Yellow Version biology to supplement the existing Blue Version, introduction of the Red Version biology course for non-college students in Grade 10, change to the Life Science program in Grade 7, addition of Earth Science for terminal students in Grade 11, a course in Applied Physics for non-college students in grades 11 and 12.

MATHEMATICS

The mathematics department always striving for an improved program has several noteworthy accomplishments to its credit - a new course for Grade 12 - Pattern IV students known as Math IV. The course stresses unifying concepts in mathematics and is expanded to include probability, set theory and trigonometry. In Grade 10 - Patterns I & II a new course in Contemporary Mathematics I has been introduced featuring a more modern approach. Inasmuch as this course has been designed in two parts on a sequential basis, a second course entitled Contemporary Mathematics II will be added in 1968-69. A new modern program for Grade 12 - college preparatory students will be developed during the department curriculum deliberations this spring. There has been a cooperative and unified approach to curriculum innovations by the Science and Mathematics Departments the results of which have been most favorable.

MODERN & FOREIGN LANGUAGE

The modern foreign language program features the audio-lingual system for speaking proficiency. Consequently, it is necessary to pursue the study of French for a longer period of time than required of the traditional system. In order to take maximum advantage of the new approach - it is necessary for a student to include in his program five years of foreign language study. Use of the language laboratory is an important factor in this program and the students in grades 8-11 taking French are scheduled for a 15 minute session, three times per week. The students in Grade 7 are involved in laboratory work for a 10 minute period three times a week. Plans are under way to expand the language laboratory facility in 1968. It should also be noted that the introduction of a second modern foreign language will be among the items studied during the current curriculum review and development activity.

BUSINESS EDUCATION

In the Business Education Department several new activities are being planned and several units of study introduced a year ago are being satisfactorily continued. Among the continuing programs are Personal Typing for students in Grade 9 - Patterns I, II, III, one semester each of Consumer Education and Business Law, and a Grade 9 course in General Business for Sections 6 and 7. Innovations for the future include a unit data processing, featuring actual practice and training on the 026 key punch formal introduction of Bookkeeping II in Grade 12 - Pattern III. Modern curriculum thinking now calls for the availability of none business education subjects for college bound students for the purpose of preparing for changes in the individual educational plans, of our students. It should also be understood the Business Educational Program in this school is designed to be terminal in nature - being of sufficiently high standard in quality and breadth of program to make employment, immediately, upon graduation indeed possible. Those students who wish to follow a two year business school program after high school will at an early time in high school be required to take college preparatory subjects. This condition has been brought about by the demand on the part of business schools for students to have taken college English and to take the SAT portion of College Entrance Examinations.

HOME ECONOMICS

Home Economics is an area of increasing popularity among our students and provides instruction and training in the essential arts of foods and clothing, together with greater understanding of the demands of our society built around the family unit. 331 students in the school are taking some course in the Home Economics Department at the present time. An extremely important course being offered for the second year to college bound seniors who have not taken any Home Economics previously is Home Economic IVS.

MUSIC

The Mahar Music Program continues to function successfully in providing for a well balanced music experience for the students in grades 7-12. As always the Senior High School Band of approximately 110 members and

the supporting majorettes drew the plaudits of people both at home and away for its outstanding appearance and quality of its music during the 1967 football season. Nineteen students were selected for participation in the All Western Massachusetts District chorus, band and orchestra. From this group eight have been recommended for the All State auditions. The Junior high chorus and band have indicated a high potential for the future which assures the continuation of a high quality program which contributes so much to the morale of the school and to its reputation throughout the county.

HEALTH

The health services were carried out in the usual satisfactory manner by the school nurse in cooperation with the school physician, important accomplishments in addition to the daily services were as follows:

Teacher Conferences	72
Parent contacts-including phone	703
Students tested for vision	922
Students tested for hearing	922
Student physical examinations by school physician	243
Clinics:	
Immunization	
TD Boosters	55
Measles Vaccine	62
Mantoux test (TB)	124

It should also be noted that the Health Department sponsors a Chapter of the Future Nurses of America Club which is one of the more active club activities each year.

PHYSICAL EDUCATION

The Physical Education program provides an organized schedule of activities and games for every girl and boy in the school twice each week. Physical fitness tests were continued as an annual basis as a regular course unit and individual proficiencies compared with those of previous years in order to note the degree of improvement. The annual physical education

demonstration was again presented and included gymnastics, exercise routines, demonstrations of physical fitness tests and the intramural volleyball championship for boys.

ART

The Art Department program again indicated what appears to be a rather unusual amount of talent among our students. The aim and purpose of the art program is threefold: first, to awaken a recognition of the tremendous role that the visual arts play in our modern world; second to awaken the latent creativity in our youth and to encourage their individual and original artistic expressions; to promote group art projects which produce results of true artistic merit.

Numerous art works and projects are on display in the school throughout the year, and the Art Department makes many contributions to the variety of co-curricular activities in the school.

DRIVER EDUCATION

In order to develop good driving techniques which will promote safety on our highways, the course in driver education is offered to students in Grade 11 and to a few in Grade 12. In accordance with requirements set forth by the Registry of Motor Vehicles, student drivers must be 16 1/2 years of age, received a permit by passing an eye test and a written examination on driving regulations. The program consists of 30 hours of classroom instruction, six hours of observing driving techniques and six hours of behind the wheel driving experience. The latter phase of the course is provided on a private basis by the Athol Driving School at a student cost of \$42.00. The Mahar Regional School through the driver training course is an active member of the National Safety Council.

LIBRARY

The library and instructional materials areas serve as the center of the academic activity of the school and continue to provide increasingly valuable services to both students and teachers. The addition of a full time instructional materials secretary in September 1967 contributed a great deal to the accomplishment of the aims and purposes of this important department. During the year the 560 new books were accessioned, classi-

fied, processed and catalogued, bringing the total to more than 5000 volumes. The library and instructional materials area are open from 7:50 AM to 4:00 PM daily.

It should also be noted that all students in Grades 7 and 8 receive instruction in library orientation during the year once each week for six weeks.

CO-CURRICULAR PROGRAM

The co-curricular area of the school program emphasizes a pleasurable experience through constructive accomplishment related to the academic areas but not necessarily a part of it. It is broad in scope including class organizations in all grades, the purpose of which is to provide the means for self-determination of class activities and functions in a responsible manner; two Student Councils, one each for the Junior High School - Grades 7-8-9 and for the Senior High Grades 10-11-12 which function as the two major, high level student government bodies in the school; two National Honor Society groups, a National Junior Chapter Grades 8 and 9, and a National Senior Chapter Grades 10-12. Membership is based upon demonstration of the four basic qualities of scholarship, leadership, citizenship and service to a high degree. A program of formal student clubs meet according to a regular schedule once each month. Among the most active clubs are the Fish and Game Club, the Varsity "M" Club, the Future Teachers Club, the Future Home-makers Club, the Future Nurses Club, and the Key Club. The members of these organizations contribute valuable services to the school throughout the year.

GUIDANCE

The area of Guidance each year becomes more and more essential to the overall school operation in providing important services to both the teachers and students of the school.

A broad testing program in cooperation with the other school systems in the Mahar District is conducted each year. Other primary functions include individual student counseling, student program selection, academic problems and assistance with personal problems where necessary. Each student in the school continues to have the benefit of at least two and in many cases several counseling conferences during the year. The Guidance Department provides a most adequate service of college and post secondary selection information and advice together with much information for these institutions of higher learning which eventually leads to the acceptance of

the applicants. In 1967 a total 90 students out of a graduating class of 146 were assisted in their plans for post secondary education and training. A description of the scope of this extremely important activity is as follows:

Students admitted to four year colleges	44
Nursing schools	4
Junior colleges	13
Technical and trade schools	11
Business schools	6
Miscellaneous programs	12
Total	90
90% of the class were admitted to four year colleges.	
61. 6% of the class continued to pursue post-secondary educational programs.	

A concerted effort is made to keep students in school as long as possible and the Guidance Department should be credited with much of the success in keeping the student drop-out rate at a low figure. Twenty-five students left school during the year representing approximately 2.8% of the school enrollment.

Another area requiring considerable attention of the Guidance counselors is the constant reduction of academic failures. A satisfactory degree of accomplishment is clearly in evidence with only 28 students failing one or more subjects for the year, a figure representing approximately 3% of the total enrollment.

SPECIAL PROJECTS TITLES II AND III OF THE ELEMENTARY AND SECONDARY EDUCATION ACT AND THE NATIONAL DEFENSE EDUCATION ACT

During the year federal title projects were prepared and approved in science, mathematics, history, geography, business education and library. Valuable equipment and materials were acquired which have been of considerable benefit to the instructional program. Important projects for 1968 in science and modern languages are awaiting approval by the Massachusetts Department of Education.

In closing my report, I wish again to express my gratitude to the Mahar Regional School Committee and my co-workers who have been so cooperative to the school department and to me during the year.

Respectfully submitted,

KERMIT W. COOK
Superintendent and Secretary
Ralph C. Mahar Regional
School District
